This is an office action for serial number 10/010,101, entitled Stand, filed on November 8, 2001.

***Election/Restrictions***

Claims 4, 6, 7, 13-23, 25-35 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 29, 2003.

***Allowable Subject Matter***

The indicated allowability of claims 1-3 is withdrawn in view of the reference(s) to Wirth. Rejections based on the cited reference(s) follow.

***Specification***

The disclosure is objected to because of the following informalities: the specification includes U.S. Patent Application Serial No. \_\_\_\_\_ throughout the specification. The U.S. Patent Application Serial No. must be provided. Any blanks regarding Patent Application No. and/or Patent No. must be provided.

Appropriate correction is required.

Art Unit: 3632

The abstract of the disclosure is objected to because (Figure 3) is included after line 5 . Correction is required. See MPEP § 608.01(b) .

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the

Art Unit: 3632

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Wirth et al. (Wirth) 6,105,909. Wirth discloses an upright column (7 including 249), a support arm (9 and 11), a cable pull (248), a device for applying constant balancing force (246), at least one deflecting roller (263), a generally horizontal arm (35).

#### ***Allowable Subject Matter***

Claims 5, 8-12, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***
